

STATE OF CALIFORNIA
WATER RESOURCES CONTROL BOARD
DIVISION OF WATER RIGHTS

PERMIT FOR DIVERSION AND USE OF WATER

PERMIT 20588

Application 28078 of Robert E. Withrow and Elizabeth A. Withrow

P.O. Box 2849, Carmel, California 93921

filed on March 28, 1984, has been approved by the State Water Resources Control Board SUBJECT TO VESTED RIGHTS and to the limitations and conditions of this Permit.

Permittee is hereby authorized to divert and use water as follows:

1. Source:

Tributary to:

(1) Unnamed Stream	Mill Creek
(2) Unnamed Spring	Unnamed Stream thence
	Mill Creek thence
	Pacific Ocean

2. Location of point of diversion:	40-acre subdivision of public land survey or projection thereof	Section	Township	Range	Base and Meridian
(1) STORAGE NORTH 100 FEET AND EAST 1,800 FEET FROM SW CORNER OF SECTION 29	SE $\frac{1}{4}$ OF SW $\frac{1}{4}$	29	22S	5E	MD
(2) DIRECT DIVERSION SOUTH 2,000 FEET AND EAST 1,700 FEET FROM NW CORNER OF SECTION 32	SE $\frac{1}{4}$ OF NW $\frac{1}{4}$	32	22S	5E	MD

County of Monterey

3. Purpose of use:	4. Place of use:	Section	Township	Range	Base and Meridian	Acre
RECREATIONAL						
STOCKWATERING	UNNAMED RESERVOIR WITHIN SE $\frac{1}{4}$ OF SW $\frac{1}{4}$	29	22S	5E	MD	
DOMESTIC						
IRRIGATION	SE $\frac{1}{4}$ OF SW $\frac{1}{4}$	29	22S	5E	MD	
	SW $\frac{1}{4}$ OF SE $\frac{1}{4}$	29	22S	5E	MD	
					TOTAL	1.5

The place of use is shown on map on file with the State Water Resources Control Board.

5. The water appropriated shall be limited to the quantity which can be beneficially used and shall not exceed (a) by direct diversion: (1) 9,125 gallons per day from March 1 to November 1 of each year for irrigation purpose; (2) 273 gallons per day from January 1 to December 31 of each year for domestic, stockwatering and recreational purposes; and (b) by storage, 20 acre-feet per annum to be collected from October 1 of each year to May 31 of the succeeding year. The total amount of water to be taken from the source for all uses shall not exceed 26.5 acre-feet per water year of October 1 to September 30. (0000005)

The rate of diversion to storage shall not exceed one cubic foot per second. (000005J)

6. The amount authorized for appropriation may be reduced in the license if investigation warrants. (0000006)

7. Construction work shall be completed by December 31, 1994. (0000008)

8. Complete application of the water to the authorized use shall be made by December 31, 1995. (0000009)

9. Progress reports shall be submitted promptly by permittee when requested by the State Water Resources Control Board until a license is issued. (0000010)

10. Permittee shall allow representatives of the State Water Resources Control Board and other parties, as may be authorized from time to time by said Board, reasonable access to project works to determine compliance with the terms of this permit. (0000011)

11. Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust. (0000012)

12. The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the State Water Resources Control Board if, after notice to the permittee and an opportunity for hearing, the Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the Board finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges. (0000013)

13. During the direct diversion season specified in this permit, the total quantity and rate of water directly diverted and used under this permit and under permittee's claimed existing right for the place of use specified in the permit shall not exceed the quantity and rate of direct diversion and use, respectively, specified in this permit. If the permittee's claimed existing right is quantified at some later date as a result of an adjudication or other legally binding proceeding, the quantity and rate of direct diversion and use allowed under this permit shall be the net of the face value of the permit less the amounts of water available under the existing right.

Permittee shall forfeit all rights under this permit if permittee transfers all or any part of the claimed existing right for the place of use covered by this permit to another place of use without the prior approval of the Board. Permittee shall take and use water under the existing right claimed by permittee only in accordance with law. (0000021)

14. This permit shall not be construed as conferring upon permittee right of access to the point of diversion. (0000022)

15. The equivalent of the authorized continuous flow allowance for any 30-day period may be diverted in a shorter time, provided there is no interference with other rights and instream beneficial uses, and provided further that all terms and conditions protecting instream beneficial uses are observed. (0000027)

16. This permit is subject to the continuing authority of the State Water Resources Control Board to reduce the amount of water named in the permit upon a finding by the Board that the amount is in excess of that reasonably needed to be held in storage for the authorized use. No action will be taken by the Board without prior notice to the owner and an opportunity for hearing. (0000042)

17. Permittee, when required by the State Water Resources Control Board, shall install and maintain an outlet pipe of adequate capacity in the dam as near as practicable to the bottom of the natural stream channel, or provide other means satisfactory to the Board, in order that water entering the reservoir which is not authorized for appropriation under this permit can be released. Permittee shall submit plans and specifications of the outlet pipe or alternative facility to the Chief of the Division of Water Rights for approval within six months of the date upon which the Board issues notice that an outlet is required. Permittee shall furnish evidence which substantiates that the outlet pipe or alternative facility has been installed in the dam. Evidence shall include photographs showing completed works or certification by a registered Civil or Agricultural Engineer. (0050044)

18. For the protection of the fishery resource, permittee shall continuously bypass from January 1 to December 31, one cubic foot per second or the natural flow, whichever is less. (0140060)

19. Prior to construction of the diversion structure, permittee shall have said structure approved by California Department of Fish and Game. (0340300)

20. Permittee shall install and properly maintain in the reservoir a staff gage satisfactory to the State Water Resources Control Board, for the purpose of determining water levels in the reservoir. Permittee shall record reservoir surface elevations on a monthly basis and submit said information to the State Water Resources Control Board on an annual basis. (0100300)

21. Permittee shall grant California Department of Fish and Game right of access to the reservoir at any time. (0480300)
22. No water shall be used under this permit until all necessary federal, state and local approvals have been obtained. (0340300)

This permit is issued and permittee takes it subject to the following provisions of the Water Code:

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

Dated: FEBRUARY 06 1992
